Nexans Cable Management

Cable Clamps & Cleats for LV/MV/HV

 **Nexans**

SUMMARY

01. About us	4
02. Polyamide - Cable Clamps	5
03. Stainless Steel - Cable Clamps	12

About us

Cable Clamps & Cleats

Nexans offer a range in polyamide clamps and stainless-steel cleats suitable for single and trefoil cables and offer advice and recommendations on applications and mounting fixtures.

Cable clamps and cleats play a crucial role in securing electrical cables across **high voltage (HV), medium voltage (MV), and low voltage (LV) applications**. Their primary function is to **prevent excessive movement, reduce mechanical stress, and protect cables from damage**, ensuring the reliability and safety of electrical installations. Proper cable management is essential to **mitigate risks associated with short circuits, environmental hazards, and mechanical wear**.

By leveraging Nexans' expertise in cables & power accessories & cable management, businesses can ensure safe, efficient, and reliable end-to-end cable installations across diverse industries.

Applications

Cable clamps and cleats are widely used in **industrial, commercial, and infrastructure projects**, including:

- Power transmission and distribution networks
- Substations and switchgear installations
- Renewable energy projects (solar, wind & (BESS) battery energy storage systems)
- Railway and transportation systems
- Oil, gas, and mining industries
- Data Centres

Benefits

Their benefits include:

- Enhanced cable stability to prevent movement during electrical faults
- Protection against mechanical damage and environmental factors
- Compliance with safety standards such as IEC 61914
- Improved cable lifespan by reducing wear and tear

Polyamide Cable Clamps

Model FOX-SI (Single)

Mounting fixtures not included

Short circuit proof Installation of one (1) single- or multi-conductor cable or tube

FEATURES/ INFORMATION

- Temperature range: -40 to 120° C (225°C) momentarily
 - Classification: Burning: S3; Smoke: SR2; Dripping: ST-2
 - Flame resistance: UL94 V-0 class 3, Halogen-free
 - Resistance: Oils, Radio activity, Salt water, Ozone, Fuels, Alkalis, UV rays
- Mounting torque: max. 5-8 Nm
 - Mechanical strength: up to 90,000 N
 - All models SI stackable (FOX-SI Ø 130-170 excluded)
 - Certified: according NEN-EN-IEC 61914: 2016

Model FOX-TRI (Triple)

Mounting fixtures not included

Short circuit proof Installation of three (3) single- or multi-conductor cables or tubes

FEATURES/ INFORMATION

- Material: black Polyamide, Fibreglass-Reinforced
 - Temperature range: -40 to 120° C (225°C) momentarily
 - Classification: Burning: S3; Smoke: SR2; Dripping: ST-2
 - Flame resistance: UL94 V-0 class 3, Halogen-free
 - Resistance: Oils, Radio activity, Salt water, Ozone, Fuels, Alkalis, UV rays
- Mounting torque: max. 5-8 Nm
 - Mechanical strength: up to 85,000 N
 - Models FOX-TRI Ø 26-39 and 39-54 are stackable
 - Certified: according NEN-EN-IEC 61914: 2016

Block Model FOX-UNI (Universal)

Installation of single or multi-conductor cables/tubes Ø 15-49 mm

FEATURES/ INFORMATION

- Material: black Polyamide, Fibreglass-Reinforced
 - Temperature range: -40 to 120° C (225°C) momentarily
 - Classification: Burning: S3; Smoke: SR2; Dripping: ST-2
 - Flame resistance: UL94 V-0 class 3, Halogen-free
 - Resistance: Oils, Radio activity, Salt water, Ozone, Fuels, Alkalies, UV rays
- Mounting torque: max. 5-8 Nm
 - Connectable by means of a double dovetail joint
 - Mechanical strength: up to 54,000 N
 - Certified: according NEN-EN-IEC 61914: 2016
 - ANZ Stock Items**

Unit of measure is for one half

The set consists of:

- FOX-UNI 0 15-34 / 30-49 Cable Block
- Unistrut (41x21mm) channel L=350-450 mm
- Kwikstrut channel nut
- Threaded rods on length/rod connectors
- Nuts and washers
- Nail plug set (incl. washers and bolts)
- At multiple layers, we use rod connectors for fast and easy installation. Also for later expansion.
- Protective cap for threaded rods
- Optional: AD 0 19-25 clamp for extra cable/tube.

2 through 7 made of high-quality Galvanised Steel, optionally: Hot-Dip Galvanised Steel, or Stainless Steel. Packed separately, per type. Non-conformities and combinations reserved.

Below you will find an overview of the standard available sets.

We are also able to supply sets in different compositions e.g. horizontally coupled. Have a look at www.fox-clamps.com

Stainless Steel Cable Cleats

CABLE SUPPORTING AND RETAINING SOLUTIONS

Stainless Steel Cable Cleats

Cable cleats are perfect for use within industrial and hazardous areas, as well as specialist applications such as oil and gas, shipbuilding, petrochemical, railway and underground, etc.

01 KNOW THE CABLES

- Which type of cable is being used, Single or Multi-Conductor?
- What is the outer diameter of Cables?
- What is the available short circuit current (RMS or IP Peak) of the cable?
- If a ground wire is installed in the cleats, know the outer Diameter of the ground wire.

02 KNOW THE SYSTEM

- What is the cable formation, Single or Trefoil?
- What type of the cable tray is installed?

Electrical and mechanical characteristics

- Cleat Material: Composite
- Frame: 50mm x 2.1mm, marine Grade, non-magnetic 316L
- Closure Hardware: Stainless steel 316L, M10 bolt and nylon lock nut
- Integral Pad: Low smoke, low fume, halogen free
- Mounting Bolt: Provided with the cable cleat
- Tools Required: Wrench
- Certified: according NEN-EN-IEC 61914: 2015

Performance on the Cable Cleats

- Resistance to Electromechanical Force:
Tested cable outer diameter: 35mm
 - 180kA (peak) 300mm spacing
 - 125kA (peak) 600mm spacing
- Max and Min Temperature: -40°C~ 120°C
- Lateral Load Test: Average 25kg
- Axial Load Test: Pass
- Needle Flame Test Resistance to Impact 30 seconds
- Resistant to UV light Test: 1000 hours
- Resistance to Impact: Very heavy

PROTECTION AGAINST HARSH CONDITIONS AND HIGH SHORT-CIRCUIT CURRENTS

- ✓

Approved by DNV (Det Norske Veritas) and ABS (American Bureau of Shipping)
- ✓

Support and retain the cables and conductors within the cable tray system
- ✓

Prevent damage in short-circuit condition
- ✓

Reduce the mechanical load exerted to the cable and conductors in every conditions
- ✓

Designed for use within industrial and hazardous areas, as well as specialist applications
- ✓

Maximum operating temperature of 120° C
